8 April 1958

MEMORANDUM FOR: Project Director

SUBJECT : C and E Racks to National Security Agency

1. By memorandum of January 17, 1957 (see attached) you informed the Director National Security Agency that we would loan National Security Agency one each of C, E, and F racks.
2. The F rack is no longer a part of required equipment for read-out of System Three.
3. A C rack was delivered to National Security Agency but was pulled back to Barton Hall for de-bugging. It is now ready for use.
4. An E rack (which is only of use for read-out of System Three tapes) is now at Barton Hall, checked out and ready for use. 25X1A9A
5. On April 7, 1958 by arrangement through [] two technicians from National Security Agency were invited to visit Barton Hall and to appraise whether National Security Agency would wish to use the racks as compared with their present means of read-out. Their answer was affirmative.
6. In view of the time that has elapsed since your memorandum of January 1957 it seems to me best to confirm with you that carrying out the contemplated loan of racks was still in order at this time.

RECOMMENDATION:

7. That you approve the transfer to National Security Agency of a C and E rack.
